

24642607 | Near-equal input gaps, different generated feedback

Same initial RGB / DVGT range / seed 42 | Input near-gap difference: -3.7 mm | 117 frames, 15 decisions

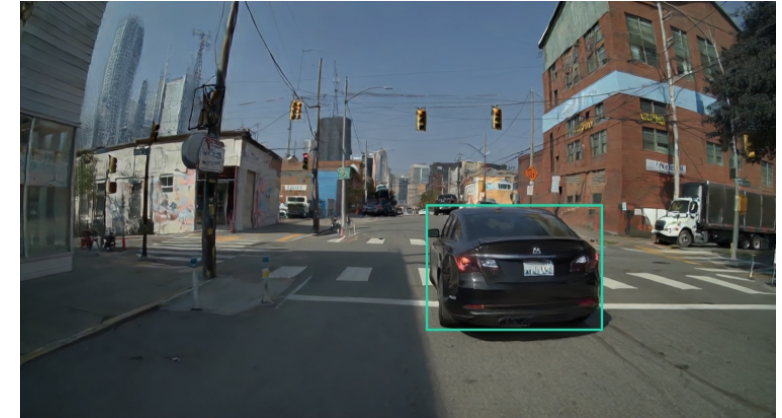

(a) Recorded initial RGB

(b) Fixed class dimensions
Generated RGB at 3.60 s

(c) Visible-extent fit
Generated RGB at 3.60 s

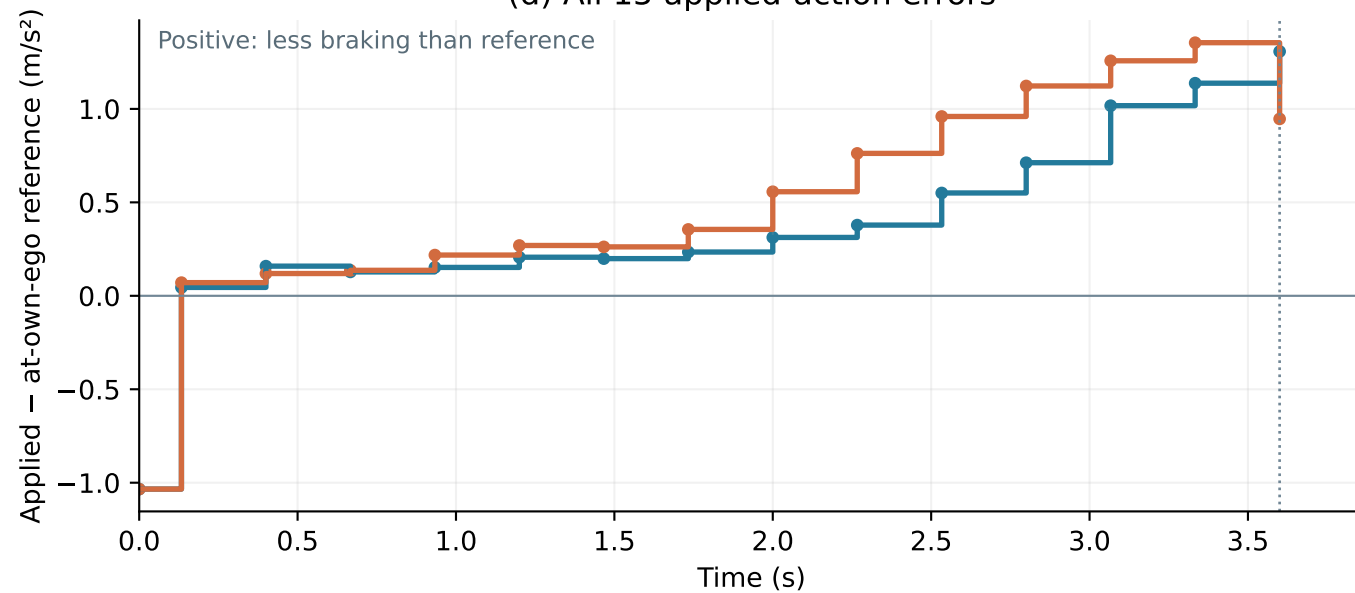

Shared initial frame; route, terrain,
other actors and relative future motion fixed.
Green boxes: actual policy detections.

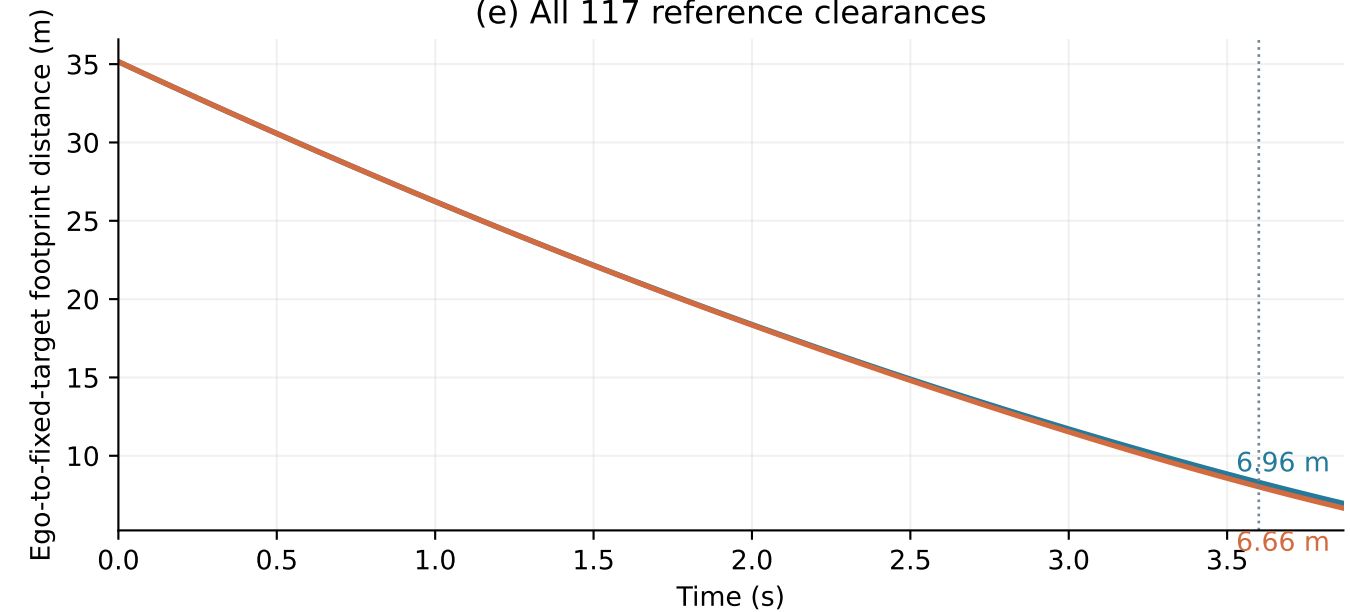

Input L/W/H: 3.90 / 1.60 / 1.56 m
Applied acceleration: -1.69 m/s²
At-own-ego reference: -3.00 m/s²

Input L/W/H: 3.90 / 1.81 / 1.34 m
Applied acceleration: -2.05 m/s²
At-own-ego reference: -3.00 m/s²

(d) All 15 applied-action errors

(e) All 117 reference clearances

Both runs: no fixed-reference overlap. Single seed; exposed development log. Shape and center change together.

Snapshot chosen by largest paired action difference after shared startup. Ego paths already differ; images are not matched-pose renders.
